Alternatively use the size chart below.

Important when deciding your size

Tops

Do not exceed the maximum measurement on chest and waist figures in the size chart. If you believe you need a slightly larger size, go up to the next measurement indicated – even if the chart shows this is a longer body length.

Shorts and Tights

Choose one size smaller than the tops. All shorts and tights are made from a very flexible material and are cut to be very tight fitting. The shoulder straps should be tight when standing upright.

Example

For a male of 180cm height, weighing 76kg, with a chest measurement of 103cm and waist 84cm, the correct choice would be XL in all top parts and L in shorts and tights.
